# ADVANTAGES

## **Efficiency**

Instead of fumbling through endless amounts of paper binders or boxes, with today's software and technology you can electronically store all of your exhibits, and have them all one click away.

## **Presentation**

With portable projectors and screens, instead of making copies and blowups, or having to stand next to an Elmo, it is now possible to display an image or a document and zoom in or highlight certain areas for the jury to see instantly.

## **Attention**

Keeping the jury's attention is an ongoing battle throughout trial. With professional presentations and active graphics to show the jury, your case is more likely to keep their attention during trial, and more likely to leave an impression during deliberation.
